PROFESSIONAL SUMMARY

Results-oriented software engineer with 3+ years of experience building ATS-focused career tooling and modern web applications. Strong in React, Node.js, and performance optimization, with a proven ability to ship reliable full-stack features end-to-end.

CORE SKILLS

React, Vite, JavaScript (ES6+), Node.js, Express, Tailwind CSS, MySQL, REST APIs, PDF/DOCX Generation, Git, CI/CD, Unit Testing, ATS Optimization

EXPERIENCE

Software Engineer | JobTube Eco System

2023 - Present

- Built deterministic resume generation flows replacing unstable AI-dependent paths, improving success rate for DOCX/PDF output to near 100%.
- Implemented ATS scoring and keyword alignment workflows across upload, optimize, and create-from-scratch pipelines.
- Improved UI/UX in Resume Optimizer with robust error handling, download controls, and testing-focused mock data support.

PROJECTS

Resume Forge (Full Stack)

- Engineered PDF and DOCX export using pdfkit and docx with Base64 payload transport and client-side download triggers.
- Designed ATS-first layout and keyword extraction logic to produce recruiter-friendly resume outputs.

Developer Productivity Toolkit

- Created reusable upload and parser components to streamline profile analysis and resume management features.

EDUCATION

B.Tech in Computer Science

JNTU Hyderabad | 2019 - 2023

CERTIFICATIONS

- JavaScript Algorithms and Data Structures
- Modern React Development Practices
- SQL for Application Developers
